EXILIS FAT REDUCTION AND SKIN TIGHTENING

Exilis Elite is a non-surgical solution that uses radio frequency for fat reduction. This procedure uses safe radio waves to heat your skin and target fat cells. This thermal energy speeds up the metabolic activity of the fat cells causing them to shrink. A great treatment for stubborn pockets of fat including upper arms, love handles, saddle bags, inner or outer thighs, stomach, bra roll and more.

From \$300 per treatment area.

VANQUISH FAT REDUCTION

Vanquish is a revolutionary non-invasive Selective RFTM system designed to deliver energy to your body to eliminate fat cells in the abdominal area. The device selectively delivers the energy to fat with virtually no risk of overheating the skin, muscles or internal organs. It then causes the natural death of fat cells - also known as apoptosis.

A course of 4 treatments, performed every 7-10 days is recommended for best results.

\$650 per treatment. Discounted packages available.
